VLED15VMB

15" LED Screen for Vehicle use

The Concept Pro VLED15VMB is a high resolution 15" LED monitor designed specifically for vehicle use including public transport, private coaches or any vehicle requiring a monitor display.

The monitor is housed in a robust metal casing with all external controls disabled to prevent adjustment by unauthorized use. All monitor features can be operated by the monitor remote control (included). The VLED15VMB is powered by 24V DC (commonly used on vehicles).

To conserve workspace the monitor can be easily wall-mounted using industry standard VESA mounting equipment. Possible applications include displaying customer information or in-vehicle advertising and notifications.
